

Project Design Solution Architecture

Date	9 Feb 2026
Team ID	LTVIP2026TMIDS71831
Project Name	Translingua: ai-powered multi-language translator
Maximum Marks	4Marks

Solution Architecture:

Solution architecture is the process of designing and describing technology systems that solve specific business problems. It acts as a bridge between business needs and technical execution.

- . **Identify the Best Tech Solution:** Choose technologies that effectively address business challenges.
- . **Describe System Characteristics:** Communicate structure, behavior, and features to stakeholders.
- . **Define Features & Phases:** Lay out development stages and functional requirements.
- . **Provide Specifications:** Establish guidelines for managing and delivering the solution.
